- Socket: Midland 2pin
- Call button
- Recharge USB port

Codice: C1459

COMPLIANCE

Device in compliance with the RED 2014/53/EU regulation

SOFTWARE

Midland improves the XT line of excellence and makes it **PROfessional**.

What does it mean?

More functions, better performance and greater safety.

XT30 PRO keeps the green colour to give continuity, but definitely expands its performance with a wider frequency band (PMR446: 446.00625 - 446.19375MHz) and resistance to humidity and dew (splash proof).

This model keeps communication over distances up to 6 km in optimal conditions, the ease of use that distinguishes the entire XT line and all the features already present.

While remaining tools within everyone's reach, walkie talkies are the ideal companion for your excursions.

Simple and light, as well as very practical, ideal for the outdoors, they can increase the level of safety while carrying out this kind of activity.

Especially when you go out as a couple or in a group, **this tool becomes indispensable**, because it allows you to keep in close contact with your partner, and prevent an unexpected event from turning a pleasant trip into a situation that is not easy to deal with.
